Skills

Most of my skills are in the service/customer service industry, however, I do have strong skills with technology as well. I have three years experience in various areas of retail including unpacking freight, stocking shelves, customer relation, running registers, working with a team, managing other employees, and opening and closing a store. I have over five years experience as a barber. Skills I've developed from that include an eye for precision and detail in artistic design, strong communication and conflict resolution skills, and good problem solving skills. I also have above average skill and knowledge with technology; primarily within the Android and Windows operating systems, and a fair amount with the hardware of computers.

Experience

December 2017 - March 2020

The Salt Lake Barber Company – *Barber*

- General business operations such as taking payments, managing cash, sharing information and answering questions for customers.
- Following strong sanitation and cleaning practices to ensure customer safety.
- Artistic design to achieve the customers desired results.

January 2015 - December 2017
